THANK YOU
to all the generous investors, donors, partners, and friends who supported our work

FishCat.org
Dear FishCat Investor,

Despite the pandemic, we established our first Earth Camp and a 30-acre Nature Reserve, restructured the FishCat conservation model, created 5 new contract-based jobs, and set up a system for land partner incentives. We put this on FishCat.org so you get to see exactly how we put your money to use.

A big thank you to all who stood by us during the tough year of 2020 — we feel we survived the worst — and are now looking forward to the growth of our conservation actions in both India and Sri Lanka.
We spent the last three months building relationships and sourcing local materials to establish our first solar-powered sustainable Earth Camp in coastal Andhra, India.

100+ citizens have already camped here, immersing themselves in conservation actions to protect native species and restore the surrounding coastal + mangrove ecosystems.

Thanks to your support, we're closer to our goal of solidifying partnerships with local landowners to restore at least 150+ acres in the region and lead carbon-negative livelihoods.

I invite you to visit our camp and follow our social media updates from the field to see your investment at work.

Ashwin Naidu
Co-founder + CEO
Your investments helped us initiate long-term partnerships with landowners and farmers in India, Sri Lanka, and the United States.

After our first Earth Camp, we have been working with our partners based on renewable incentive contracts to reforest their own lands with native species 🌿

This model can help us create more wildlife habitats and prospects for sustainable harvest of forest products. We also plan to establish these partner lands as mini carbon sinks and nature reserves that anyone can adopt — this can further incentivize employment in conservation and bring about carbon-negative livelihoods.

While we are working hard to develop this idea, so we wanted to thank you with a personal note for your support and for being such an integral part of our mission.

Dear FishCat friends and investors,

Thank you for all the incredible support you have given to us for over half a decade.

Earlier this year, we realized a growth plan for Fishing Cat Conservancy: to work on creating scalable services that can help restore and protect our planet’s most valuable ecosystems.

With FishCat.org, or simply FishCat as our new tradename, we’re working to partner with global communities to help restore deforestation, extinction, and climate change.

Imagine earth where we are incentivized to restore and reforest our own lands to lead sustainable, carbon-negative livelihoods. We are looking to get there.

On behalf of the team @FishCat.org

Ashwin Naidu
You are helping us establish our first community-managed nature reserve, the [FishCat Nature Reserve](https://www.FishCat.org) in Andhra Pradesh, India.

Our Nature Reserves model incentivizes farmers, landowners, and village [community partners](https://www.FishCat.org) to reforest their lands and pursue conservation as a sustainable livelihood. We envision these reserves will create many new conservation jobs.

[TED Ideas](https://www.TED.com) recently featured FishCat's actions and plans — author Karen Eng highlights the ecological and economic value of mangroves 🌿

Each campaign is unique and links to the partner lands we are working to restore and transform into nature reserves. With your purchase, you are helping adopt these ecosystems, create conservation jobs, and offset your carbon footprint 🌿.
You’ve seen our progress over the years, but it hasn’t always been smooth sailing. Since 2015, we failed to sustain many of our projects, but we stuck to our goals and kept moving forward toward our mission of sustainability. We began with a project to discover and protect fishing cats, and now we’ve evolved into an organization that employs people to restore whole ecosystems.

At FishCat, it’s always Day 1 for us, and we are constantly experimenting with our collective ideas — innovation is always at the top of our minds. In this talk, we open up on the idea of how ecological sustainability needs to go hand-in-hand with economic sustainability.
As investors of FishCat, we can never thank you enough for your contribution to our mission. More importantly, we’re excited to show you our progress on the ground. This year we opened up our eyes to the possibilities and products of interdisciplinary collaboration — some of this is what you see on FishCat.org. After the pandemic subsides, we hope you can visit our first Nature Reserve in India and one of our partner lands, the Gal Oya Lodge in Sri Lanka.

Facebook, Twitter, LinkedIn, and Instagram can only go so far. We would love to have you visit and participate in our conservation work on the farms that we are restoring to wildlife habitats. We want our local land partners to host and share their life with you. We want you to gain first-hand experience of our work in the field and the importance of our mission to protect these vital ecosystems.

Feel free to write, join, and critique our conservation efforts — tell us what is on your mind. We would love to hear from you and implement your ideas.

For now, we’ll leave you with “Pora Beach” — a song composed remotely by the band ManaKarma (Nitin, Sumantu, and Ashwin) after their 2020 Earth Camp Experience on the FishCat Nature Reserve, which is near the Gachakayala Pora village in India. Here’s wishing you a very happy holiday season and new year in advance! 🎄❄️
Natalie Palmer joined as Executive Assistant for FishCat in October. She came to us with an education in international relations and her interest in working for global nonprofit organizations. Here is a message from her:

We hope you are staying safe in these uncertain times. Thank you on behalf of the FishCat team for all your dedication and support of our work in India, Sri Lanka, and the US.

Now, more than ever, people have gained an appreciation for nature and its value to people. We hope to garner this enthusiasm and continue to build our network with committed investors like you. Thank you once again for all your support!
